-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to because the arrows for gear 134 in FIG 14 should be in the opposite direction.
2. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities:

Art Unit: 3724

- Page 3, paragraph 2, line 1: A comma should be placed after the word "Accordingly."
- Page 7, line 14: A comma should be placed after the phrase "As shown in the drawing."
- Page 10, line 3: The reference number for the second pink roller shaft should be changed from "158" to - -152- - in order to agree with the drawings.

Appropriate corrections are required.

Claim Objections

4. Claim 1 is objected to because of the following: the phrase "the distance" (line 3) lacks proper antecedent. In addition, the phrase "arranged to power advancement" should be changed to - -arranged for power advancement- - or equivalent. Appropriate corrections are required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Saito et al (5,133,615). Saito et al discloses a ticket dispensing mechanism (3) capable of separating a selected number of instant lottery tickets from a continuous strip (6) perforated at intervals (6a), said dispensing mechanism (3) comprising: control

means (44) for presetting a distance that the continuous strip of tickets (6) will travel, which pre-set distance corresponds to the number of tickets to be separated and subsequently dispensed; a motor (416) constructed and arranged for power advancement of the continuous strip of tickets (6) in both a first and a second direction; and a clutch assembly (25).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Freedman (2,331,316), Nutter et al (2,795,875), Dodge et al (2,86,531), Crane (2,980,307), Weingart (3,064,785), Currie, Jr. et al (3,329,807), Palter (3,412,913), and Weir et al (3,501,622) disclose dispensing mechanisms.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carolyn T. Blake whose telephone number is (571) 272-4503. The examiner can normally be reached on Monday to Friday, 8:00 AM to 5:30 PM, alternating Fridays off.
